# Nadi Easy Method of Determining Profession

By Sri Bhaskar Chakraborty, India

The necessary ingredient of our Indian philosophy or 'Vedantik' Darshana' is underlying in the Karma theory. As per Lord Sri Krishna's Verse no one can sit for a while without doing any Karma. Karma has a wider range of meaning. It is the Karma which is called the 'Purusartha' in Sanskrit. It has a great role to play in shaping one's destiny. This Karma in modern parlance is termed as profession or working for a livelihood.

According to the general rule of Astrology 10th house, its lord, its dispositor, the aspects there of decides the livelihood of any individual. The 2nd house there from i.e. the 11th house signifies gain, income etc. Saturn is the owner of the two succeeding signs i.e. 10th & the 11th house of the natural Zodiac. So, the mystical planet Saturn has a definite role to play in one's professional sphere. *Sage Bhrigu* has given paramount importance to the natural zodiac's different houses according to their sign lord. *Sage Satyacharya* also paid due attention to the planet Saturn by saying 'Karka of Karma' etc. As according to the principle of *Bhrigu Nadi* '*Saturn aspected by planets or the planets aspecting Saturn's 2nd house denotes the working places or the profession of the native*'. This has a larger meaning. We should not misinterpret those lines by giving some narrow meanings. What the Sage probably intended to indicate to us is that the Saturn is desire-less and when he is aspected by some other planets (nadi aspect) or is associated with some other planets he will be influenced by the same or when he is alone, *not aspected by any planet* it will be enriched with the energy or *energies of the next house*. For detailed understanding one should have the brief idea about the nature of all the planets and the Rasi Karakatwas. All the twelve Rasas have their own nature like Mesha is a fiery, dry, technical, has the ability to change the form by fire, powerful, dominating etc. etc.
