## The Seven Aspects of Life

(The Saptha Varga Phala in Astrology)

1. The Body and General Happiness in Life.
2. Wealth, Finance and Prosperity in Life.
3. The Happiness and Prosperity of Blood Relations, such as Brothers, etc.
4. The Happiness and Prosperity of Children or Issues (Speculation).
5. The Happiness and Prosperity of Wife or Life-partners.
6. The Happiness and Prosperity of Parents.
7. The Bad or Worst Time of Life in which one undergoes Hardships and Troubles, Difficulties and even dies.

### Hora

If the planets are within the first 15 degrees of an odd sign, such as Mesha, Mithuna, Simha, Tula, Dhanus and Kumbha, they are of Surya Hora. The planets that are situated in the second half of an odd sign (*i.e.*, from 16 to 30 degrees) they are said to be in Chandra Hora.

If the planets are within the first 15 degrees of an even sign such as Vishabha, Karkataka, Kanya, Vrischika,

Makara and Meena they are in Chandra Hora and if they are situated in the second half of these Rasis, *i.e.*, between 16 and 30 degrees, they should be placed in the Surya Hora.

It is the practice of some astrologers to prepare a chart and place all those planets of Chandra Hora in Karkataka Rasi and those of Surya Hora in the Simha Rasi. But it will be more convenient to place all those planets in the same Rasi if they are from 0 degree to 15 degrees and all those planets that are from 16 degrees to 30 degrees in the next sign without any distinction whether they are in odd or even signs; this gives a better result. Out of the Hora chart as it is understood those planets that are situated in the odd signs are in Surya Hora and those that are situated in even signs are in Chandra Hora.

The Saptha Varga Table is prepared as said above to show the various Vargas and to find out the energy or strength of the lord of Lagna and of each planet depending on the number of Vargas each planet depends on its own Varga and friends' Varga, enemies' Varga, etc. The Sidereal time noted in these columns is calculated only on the Indian Sowramana basis and not the Solar Sidereal time. But the Varga Table is applicable for both Stellar as well as Solar Systems if one desires to apply them. It is a strong planet if a planet owns all the 7 Vargas and his strength reduces according to the number of Vargas if it is less than this maximum. One should find out the strength of all the planets and the lord of Lagna before concluding the results to predict.

which depend on this strength. Ancestors were predicting the raise and fall of prices of commodities and the results of the horoscopes—personal, national, political, commercial or otherwise—depending on this strength generally and so this table is given here for the use of our readers.

The following table shows the friends or enemies of each other:

For	Enemies	Friends	Equals
Sun	Saturn, Venus	Jupiter, Moon, Mars	Mercury
Moon	..	Mercury, Sun	Saturn, Venus, Jupiter, Mars
Mars	Mercury	Jupiter, Moon, Sun	Saturn, Venus
Mercury	Moon	Venus, Sun	Saturn, Jupiter, Mars
Jupiter	Mercury, Venus	Moon, Mars, Sun	Saturn
Venus	Sun, Moon	Saturn, Mercury	Jupiter, Mars
Saturn	Moon, Mars, Sun	Mercury, Venus	Jupiter

There are three ways of finding out the lord of the three Decanates or Drekkanas of each sign or Rasi:

*First Method.*—They are the lords of the 1st, 5th and 9th in respect of that Rasi.

*Second Method.*—They are the lords of: (a) The 1st, 5th and 9th in the case of a Moveable sign; (b) The 9th, 1st and 5th in the case of a Fixed sign; (c) The 5th, 9th and 1st in the case of a Dual sign.

*Third Method.*—They are the lords of the 1st, 12th and 11th with respect to that sign.

This table is according to the above second view only.

#### The Trimsamsa

The five planets—Mars, Mercury, Jupiter, Venus and Saturn—own two houses whereas Sun and Moon own only one house each. The planets that are situated in an odd sign, *i.e.*, 0 to 5 degrees are in Mars' Trimsamsa, the next 5 degrees Saturn's, the next 8 degrees Jupiter's, the next 7 degrees Mercury's and the next 5 degrees Venus' Trimsamsa.

In even signs the first 5 degrees are of Venus, the next 7 degrees of Mercury, the next 8 degrees of Jupiter, the next 5 degrees of Saturn and the last 5 degrees are of Mars' Trimsamsas.

The Sun and Moon have no Varga lordship in the Trimsamsa Chart.

The planets according to their degrees as explained above must be placed in their nearest house of the Varga to which they belong in the Trimsamsa Chart.

#### Planetary Aspects

All planets aspect the 7th house and the planets situated therein (from where he is situated) but Mars aspects the 4th and 8th houses and the planets in that house in addition to the above aspect. Jupiter aspects the 5th and 9th houses and the planets in those houses in addition to the 7th house. Saturn aspects the 3rd and 10th houses and planets in these in addition to the 7th house and the planets in that house. These aspects are applicable even in all the said Varga Charts as in Lagna or Rasi Charts which may be noted.

#### The Saptha Varga Tables and their Application

No astrologer worth the name in India will prepare a horoscope for predicting any important event in life or fixing an auspicious Muhurtha (time) or of travel or finding the trend of the prices of a commodity or metal or of a market or a winning horse in the race course, etc., without preparing Saptha Varga Charts in finding the strength of Vargabala of planets which represent the particular aspect concerned. It is the practice in the South to depend generally on Rasi and Amsa or Navamsa Charts while predicting events as they know that Navamsa Chart is the nearest Varga to the last Varga and the most important chart of the Vargas, which gives the correct and true position of the plane

in the Sidercal System. If a planet is situated under one and the same planet in Lagna as well as Navamsa it is said to be Vargottamamsa and is powerful in giving good result. For example, the first Amshas of the Moveable signs as Mesha, Kataka, Tula and Makara Rasis, the 5th or the middle Amshas of fixed signs as Vrishabha, Simha, Virschika and Kumbha and the last or 9th Amshas of Mutual signs as Mithuna, Kanya Dhanus and Meena are called Vargottamamsas. The planet which is in such Vargottamamsa will become strong, gives good results according to its nature and the events concerned.

Each one of these Saptha Vargas are ruled by a planet. The Varga ruled by a beneficial planet gives good result and a Varga ruled by a malefic one gives bad result of a horoscope, or of commodity, metal or horse or of a company share it represents.

The exalted planet, the waxing Moon, Jupiter, Venus and Mercury when in combination with beneficial planets such as Jupiter or Venus or alone are beneficial planets when these planets are situated in their own Vargas or exalted; they give better results being in their friendly Vargas, but when they are debilitated or in enemies' Vargas they will not give good results.

The Sun, Mars, Saturn, Rahu and Kethu, the waning Moon and Mercury in combination with malefic planets, when these planets are in their own Vargas or exalted, give good results than when they are in their friends'

Vargas, but when they are debilitated or in their enemies' Vargas they give bad results.

(a) Out of these seven Vargas if a planet is situated in two Vargas of his own it is called "Parijatamsa".

(b) If a planet is situated in three Vargas of his own, it is "Utthamamsa".

(c) If a planet is situated in four Vargas of his own, it is "Gopuramsa".

(d) If a planet is situated in five Vargas of his own, it is "Simhasanamamsa".

(e) If a planet is situated in six Vargas of his own, it is "Parvatamsa".

(f) If a planet is situated in seven Vargas of his own, it is "Devalotamsa".

(1) For example, if Mars is situated within two and a half degrees of Mesha Rasi it gets six Vargas of Mars, he rules Lagna Drekkana, Saptamamsa, Navamsa, Dwadasamsa as well as Trimsamsa. So he gets "Parvatamsa" by which he gives the best results of the house he rules in a horoscope and the best result of the commodity, the metal, the stocks and shares and the house he represents.

(2) If the Moon is situated within two and a half degrees of Kataka Rasi, she rules Lagna, Hora, Drekkana, Saptamams, Dwadasamsa and hence she will be in "Simhasanamamsa" giving very good results of the Bhava in which she is situated in a horoscope, the commodity, the metal, the stocks and shares, the house she represents.

One has to consider the majority of the Vargas of the planets auspicious or otherwise to decide the results. In a horoscope it is from the strength of the ruling planet of the ascendant and the aspects of the planet to it and its lords (and also of the Sun) one should conclude all the results of the physical body environments and the body of the person.

It is from the position of the Moon, his strength, situation and the aspects of the planets he gets one should decide the mental condition, life at the time of birth, also good results at the time of auspicious ceremonies such as marriage, travel and of transitions of planets from the radix Moon.

The wealth and happiness, the financial conditions should be decided by the Hora Chart and the situation, strength and aspects of the planets to it its lord gets and also of the 2nd house from Hora and Lagna Chart and of Jupiter's strength. The brothers and their happiness should be judged by the situation, strength and aspects to the Drekkana Varga and its lord gets, and also the 3rd house from Lagna and Drekkana Charts and strength of Mars. The issues, sons and grandchildren should be predicted by the strength, situation and the aspects of the planets in the Saptamansa situation and its lord gets—also of the 5th house from this Chart and Lagna Chart and strength of Jupiter. The happiness of wife and courtship should be decided by the situation, strength and the aspects of the planets, the Navamsa and its lord gets and the 7th house and its lord as well as the strength of Venus. The happiness of parents

should be decided by the situation, strength, Dwadasamsa and the aspects of the planets to it and its lord and the 9th and 4th houses from Lagna as well as from this Chart and the strength of Sun and Moon. Whereas the worst and the difficult results should be expected by the situation strength of the Trimamsa and the aspects of the planets to it and its lord and also from the 8th, 6th and 12th houses from this Chart and from the Lagna Chart as well as the strength of Saturn, Rahu and Ketu, etc. Here is an example of a horoscope for the application of the above-said Saptha Varga Charts:

The gentleman was born in Mesha Lagna, under Purvabhadrā, 2nd pada star where the Moon was situated; the following are the Lagna and Planets' Rasi, Degree, Minutes, etc.

Lagna	..	Mesha, 19 degrees 1 minute.
Sun	..	Tula, 10 degrees 44 minutes.
Moon	..	Kumbha, 28 degrees 56 minutes.
Mars	..	Kanya, 5 degrees 32 minutes.
Mercury	..	Vischika, 0 degrees 52 minutes.
Jupiter	..	Mithuna, 17 degrees 37 minutes.
Venus	..	Vischika, 18 degrees 37 minutes.
Saturn	..	Kumbha, 15 degrees 3 minutes.
Rahu	..	Karkataka, 13 degrees 39 minutes.
Ketu	..	Makara, 13 degrees 39 minutes.

The Sapta Varga Charts of this horoscope is as follows:

1. *The Lagna Chart*—Represents body and constitution:

	Lagna		Jupiter
Moon Saturn	LAGNA		Rahu
Kethu			
	Mercury Venus	Sun	Mars

The Lagna is Mesha, masculine sign, strong, but it has been aspected by debilitated Sun and the lord of Lagna Mars is situated in 6th house which is his enemy's house, but he aspects his own house Lagna, hence though the subject of this horoscope is strong, suffers and overcomes many health troubles; he will undergo many illnesses and sufferings including surgical treatment. Note also the Sun is debilitated in the Lagna Chart.

2. *Hora Chart*—Wealth, stability of finance, happiness, etc.:

The lord of Hora Venus is in the 8th; this Hora Lagna and his lord Venus is aspected by Saturn; so there is no stability of finance and on the contrary there will be hard struggle for money in Saturn's period. Mercury

Moon Saturn		Lagna	
	HORA		Jupiter Rahu
Kethu			
Venus	Mercury	Sun	Mars

also aspects this Hora Lagna and the Lagna is actually in Chandra Hora the lord of which Moon is in the 11th house, so he gets good chances and opportunities of making money and getting wealthy but even here, as Moon is with Saturn aspected by Mars, there will be more expenses or loss, particularly in Saturn's period and in Mars' sub-periods. But he did very well by his own earnings in Mercury's main period as he is in the 7th house aspecting favourably the Lagna and he is situated in the 11th house from the Hora Lagna lord Venus. Moon being strong, he will have some wealth and happiness though not a steady income. Moon is also in the 11th house from Lagna Chart.

3. *Drekkana Chart*—Brothers' happiness:

Lord of the Drekkana Lagna is in his enemy's house with the enemy's influence: Saturn. The Lagna is

		Kethu	
Saturn Sun Moon Jupiter	DREKKANA	Mercury	
		Lagna	
	Rahu Venus		

also strongly aspected by a malefic Mars. As the owner of Drekkana, brothers' Karaka, Jupiter and Moon also aspecting, two sisters and a brother were born but except a younger sister, the other two died early. He has no happiness of brothers due to the reasons mentioned first as above. He lost even his father's property in Saturn's period. Note also Mars is in the 6th house in Lagna Chart.

#### 4. *Saptamamsa Chart*—Issues or children and grandchildren:

The lord of this Saptamamsa Chart is in his most friendly home the lord of which Jupiter is a Karaka for children, is situated in the 11th house from the Sun. Neither the lord of Lagna nor Lagna is aspected by any planet. The Moon, a beneficial planet, is situated in the Lagna. He had more than seven children born but now only three daughters and a son are prospering. The

	Mars Rahu	Saturn Mercury	
	SAPTAMAMSA		
		Lagna Moon	
Sun		Jupiter Kethu	Venus

native is very much interested in speculation, though not very successful so far. The speculative tendency and the prosperity of a son is due to the lord of Lagna being in his friendly house; but his unsatisfactory activities in speculation is due to Venus being Neecha in this chart and also Jupiter is with Kethu in his enemy's house. The Sun is in auspicious Jupiter's Varga. Jupiter also is in Venus' Varga.

*Note.*—The Sun, lord of the 5th house, is debilitated, the 5th house is aspected by Saturn in the Lagna Chart which has also to be considered.

#### 5. *Navamsa Chart*—The happiness of wife:

The lord of the Lagna Mercury is in his enemy's house in the 11th. Jupiter, the lord of the 7th, is in his own house aspecting the Lagna. This native was married in his 19th year, but as Mars, the lord of 3rd and 8th,

Jupiter		Kethu	Moon
Mars Saturn	NAVAMSA		Mercury
Sun			
Venus			Lagna
	Rahu		

strongly aspects the Lagna, he lost his first wife and married a second time in his 39th year in Mercury's period. Mercury is in Moon's Varga, Venus is in Jupiter's Varga which are auspicious; he is very passionate and has a lot on pleasures, he is very much admired by the women class for his wit and learning. The Lagna and the lord of Lagna Mercury are aspected by an auspicious planet Jupiter who is very strong; hence he has a good family.

6. *The Dwadasamsa Chart*—The happiness of the parents:

The lord of the Lagna is in his own house with the lord of the 8th, Mercury; no other aspects to these. Sun the Karaka of the father is situated in the 4th house which is his enemy's house aspected by the most malefic Saturn himself, so the native lost his father in Saturn's

		Kethu Venus
Sun	DWADASAMSA	
Jupiter Moon		Saturn
Rahu	Lagna Mars Mercury	

main period as Lagna and Lagnadhipathi are strong being in his own Varga with Mercury. Further he was a great scholar, a very reputed person and a great man Moon being strong, with Jupiter a beneficial planet. Mother is still strong nearing eighty. This native has no father's happiness, much as he lost him in his 16th year. The exchange of houses between Sun and Saturn shows the personality of the parents which was very good.

*Note.*—The Sun is debilitated in the Rasi Chart and Moon the lord of 4th is in 11th house representing father and mother which is also to be considered.

7. *The Trimamsa Chart*—This indicates the difficulties and hardships of the native:

The lord of Lagna Mercury is with his enemy who is exalted in Venus' Varga in the 12th house. Saturn

Saturn Venus		Moon Mercury	Lagna Kethu
	TRIMSAMSA		
Rahu Sun Jupiter			Mars

aspects the Lagna, its lord. There is Kethu in Lagna and Jupiter, Sun and Rahu aspect the Lagna. The native passed a very critical period in the end of Mercury's period, *i.e.*, in Saturn's sub-period, by a sudden failure of health, which was serious. Again, as Mars aspects Venus as soon as Venus period started, the native lost his one-year-old son, a daughter of 2 years and a grown-up daughter of 23. His eyes also got affected, he lost heavily in speculation, had lots of unnecessary disputes of his property and through tenents, etc. Though Venus is exalted he is hit by the aspect of Mars and the influence of Saturn as the lord of the 8th house. Note also the lord of the 8th house is in 6th and lord of 6th is in the 8th giving a Kala Parivartana Yoga in the original Lagna Chart and also the lord of 12th is in the 3rd house.

## THE TABLE OF THE VARGAS

Days	Sidereal time	Lagna	Hora	Drekana	Sapta- mamsa	Nava- mamsa	Dwada- samsa	Trim- samsa

THE SEVEN ASPECTS OF LIFE  
THE SAPTHA VARGA PHALA  
IN  
ASTROLOGY

Guides how to know and predict the seven aspects of life such as life problems, the person you love and the duration of attachment and the partners you desire in business and the prosperity and how it ends.
